Attachments: Summary Table - Final Data.pdf

Attached for your review are the complete test results from the toxicity testing of water quality samples collected on May 20, 2009 during disposal of Niemic material at the City's CAD cell. These data will be incorporated into the plume tracking report.

Deidre,

I've attached a copy of the endpoint summary data from the New Bedford Harbor surface water monitoring report. All data are present and accounted for, final results. . . . No issues with either water from inside or outside of the containment structure.

The report is in final review and we'll get it out later this week.

Regards,
Ken
